

# HitPay Magento2 Integration guide

**HitPay** provides a seamless payment experience for your customers and an easy integration process for the developers. Hitpay payment works by creating Payment Request and then the customers accepting the Payment Request.

## Install Extension

1. Download the latest Source code zip file from the HitPay [GitHub](#) (Use the download button).
2. Extract the magento2-extension.zip.
3. Place the extracted files into app/code/SoftBuild/HitPay/ folder under Magento root path.
4. Check your Magento Mode:

Run "**php bin/magento deploy:mode:show**" to find your mode

If your Magento mode is "**production**", please run the below commands:

- i) **php bin/magento cache:clean**
- ii) **php bin/magento cache:flush**
- iii) **php bin/magento setup:upgrade**
- iv) **php bin/magento setup:static-content:deploy**

If your Magento mode is "**default**" (or) "**developer**", please run the below commands:

- i) **php bin/magento setup:upgrade**
- ii) **php bin/magento setup:static-content:deploy -f**

## Upgrade/Update Extension

1. If you're performing an update and if your already installed module version is 1.0.0(you can find version in the etc/module.xml file).
2. Please run the following commands:
  - i) **php bin/magento module:disable SoftBuild\_HitPay**
  - ii) **php bin/magento module:uninstall SoftBuild\_HitPay**
  - iii) **php bin/magento setup:upgrade**
3. Download the latest Source code zip file from the HitPay [GitHub](#) (Use the download button).
4. Extract the magento2-extension.zip.
5. Place the extracted files into app/code/SoftBuild/HitPay/ folder under Magento

root path.

#### 6. Check your Magento Mode:

Run "**php bin/magento deploy:mode:show**" to find your mode

If your Magento mode is "**production**", please run the below commands:

- i) **php bin/magento cache:clean**
- ii) **php bin/magento cache:flush**
- iii) **php bin/magento setup:upgrade**
- iv) **php bin/magento setup:static-content:deploy**

If your Magento mode is "**default**" (or) "**developer**", please run the below commands:

- i) **php bin/magento setup:upgrade**
- ii) **php bin/magento setup:static-content:deploy -f**

1. If you're performing an update and if your already installed module version is greater than 1.0.0(you can find version in the etc/module.xml file).

2. Download the latest Source code zip file from the HitPay [GitHub](#) (Use the download button).

3. Extract the magento2-extension.zip.

3. Replace/overwrite the existing app/code/SoftBuild/HitPay/ folder with the extracted files.

#### 4. Check your Magento Mode:

Run "**php bin/magento deploy:mode:show**" to find your mode

If your Magento mode is "**production**", please run the below commands:

- i) **php bin/magento cache:clean**
- ii) **php bin/magento cache:flush**
- iii) **php bin/magento setup:upgrade**
- iv) **php bin/magento setup:static-content:deploy**

If your Magento mode is "**default**" (or) "**developer**", please run the below commands:

- i) **php bin/magento setup:upgrade**
- ii) **php bin/magento setup:static-content:deploy -f**

## Configure Extension

1. Log in to your Magento Store Backend
2. Choose Stores on the Admin sidebar to the left. Now go to Settings > Configuration.
3. In the Configuration page, click on Sales on the left and choose Payment Methods.
4. On the Payment Methods page, navigate to HitPay Payment Section.
  - i) Enabled - select yes to enable the HitPay Payment Method.
  - ii) Mode - select sandbox or live mode.
  - iii) Title - This title will show under the payment methods section on the checkout page of Magento.
  - iv) API Key - Enter Your <Api Key> received from HitPay.
  - v) API Salt - Enter Your <Salt> received from HitPay.
  - vi) Enabled Auto Invoice - select yes to create invoice automatically if payment is successful.
  - vii) Debug - select yes to enable the debug, this will log HitPay API calls under var/log/hitpay.log file.
  - viii) Countries - Allow all countries or select specific countries to access this payment method.
5. Click Save Config.
6. Refresh Magento Cache.
